

CIRCUITS

KIM THOMÉ

SIZE

2.1 x 3m (6'9" x 9'9")

WEAVE

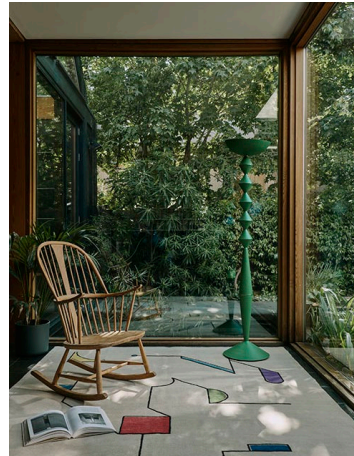

Hand Knotted

MATERIALS

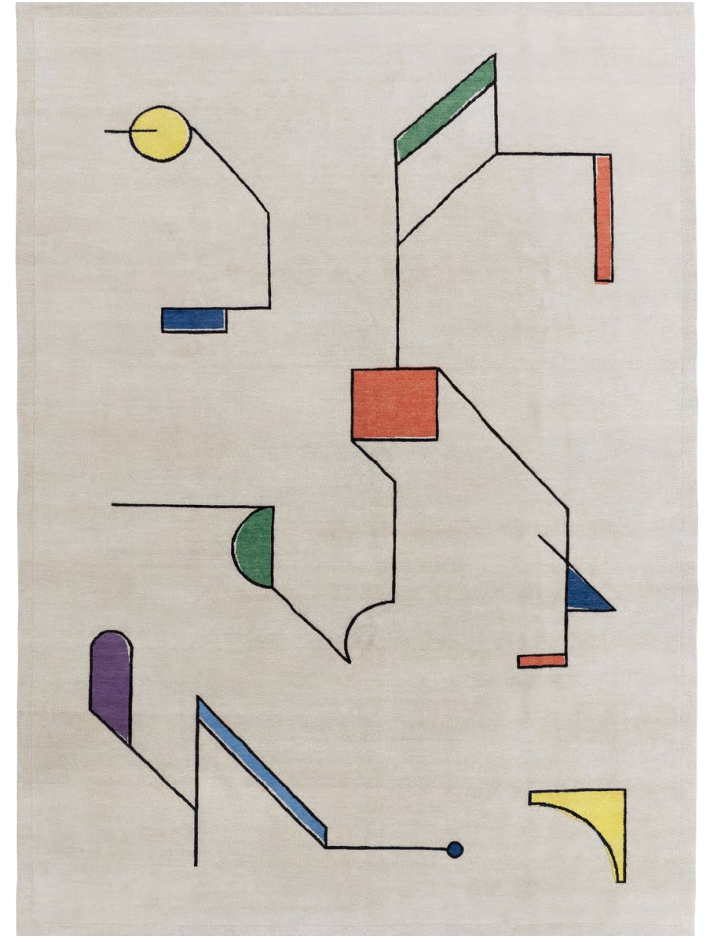

Handspun Wool

From his Margate studio-workshop, Thomé is surrounded by tools and experiments. For this project the spark of the idea came from the inner workings of a plug, which opened the world of circuit boards in the designer's mind. He was drawn to the primary colours of components and technically drawn diagrams, which he then took as a starting point, from which the Christopher Farr design team then translated into weave. Care was taken to mimic and translate his pen lines into instructions for the loom, to give the presence of the human hand, as opposed the rigid perfection of machine made rug.

These rugs are made to order and can be produced to custom colour, material, size and weave specifications.
